Custom Objects

Custom objects are database tables that allow you to store data specific to your organization in Salesforce. You can use custom objects to extend Salesforce functionality or to build new application functionality.

Once you have created a custom object, you can create a custom tab, custom related lists, reports, and dashboards for users to interact with the custom object data. You can also access custom object data through the API.

Long Term Virtual Internship Program

Salesforce Developer- Phase 2

How to Complete Short-Term Internship Program?

Step-1: Create the Trailhead Account.

You are requested to create the Trailhead account as an initial step to complete your self-learning courses and Super badges.

Link - <https://trailhead.salesforce.com/en>

Step-2: Attend the live sessions and complete the self-paced learning courses.

You need to attend the live sessions to gain hands-on experience on the Salesforce cloud which will help you in completing modules along with the super badges & supersets on the Trailhead platform. Refer to the self-paced
